

GIS/GPS SERVICES **POLICY**

PURPOSE

This policy is to generally allow the services performed by the County GIS/GPS technician to be contracted to the public on a cost recovery basis.

POLICY GUIDELINES

1. The County, through the Administration Office is able to provide certain technical services such as digital mapping, supply aerial photos, conducting GPS services, printing, etc. to the public.
2. All services provided to the public must adhere to licensing and agreements held with in Vulcan County.
3. County GIS/GPS work will take priority over any public requests and the scheduling of any public requests will be at the discretion of the GIS/GPS Technician and County Administrator. Although GIS and GPS services are conducted within Vulcan County it is not the intentions of Vulcan County to compete with private industry services.
4. These services are supplied to the public on a cost recovery basis. The fees for these services are referenced in the Fees for Services Bylaw 2011-011.
5. Community groups may be eligible for an exception to the Fee Bylaw to accommodate small one time projects at the discretion of the Chief Administrative Officer.
